GeoWave®: Harness the Forces of Nature!

SCIENTIFICALLY
PROVEN AND
PUBLISHED!

Discover the world of GEOWAVE

Energy is the subject that preoccupies us. We from GEOWAVE RESEARCH have developed a product that has been proven to work and is able to offset burdensome forces of nature. The technology is simple. The impact is great. Improved performance at work, greater relaxation at home, sound sleep – the GeoWave® makes it possible.

The patented GeoWave® is a high-tech product from the GeoWave® product family designed to boost the body's own energy. Improved quality of interior design and harmonisation of geopathically stressed areas for humans and animals. The positive biophysical effect has been proven with scientifically accepted methods, demonstrated in studies and published in one of the major scientific European journals in this area. *

* S. Karger Publishers, Basel

The wave is reputed to:

- promote restful, deep sleep
- aid improved concentration and success
- lessen stress, more peace of mind
- reduce the number of days off sick
- enhance sporting performance and speedy regeneration

HR Prim. Univ.-Prof. Dr. Gernot Pauser,

Medical Director of Salzburg
University Hospitals

"In our building we have about 50 GeoWave® waves to reduce the impact of stressed areas."

Improved Performance and Better Relaxation

This is how the GeoWave® works in the words of a sportsman:

"After 41 hours and more than 1,000 kilometres of pedalling I didn't want to get off my cycle, I just wanted to carry on."
(Rainer Popp, cycle marathon world champion).

Whether top athlete or amateur sportsman or woman, the GeoWave® has something for everyone. Enhanced and more effective relaxation and as a result improved performance and well-being during sporting activities.

Prof. Baldur Preiml,
former trainer of the Austrian ski jumping national team, author.

"The best ideas are simple. The GeoWave® is a brilliant invention that puts us back in touch with the environment. My own experience defies rational attempts at an explanation."

Feel good in all areas of home, work and life

Where can the GeoWave® be used?

- in apartments and residential buildings
- in hospitals and medical practices
- in schools, kindergartens and old people's homes
- in offices, industrial premises and shops
- at airports and in public buildings
- in wellness, fitness and sports centres
- on farms and in stables and cowsheds etc.

The success story of the wave began in 1997. It was initially used in hospitals, medical practices and in public buildings. It now has a place in all areas of life and provides a harmonious environment in the home, more energy and a shorter regeneration period in sport and more concentration and energy at work!

DI Barbara Jung,

Architecture of the Senses, Radiesthesia, Feng Shui:

"The existence of stressed areas that affect humans and can deprive them of energy has been scientifically proven! As a young feel-good architect it is a matter of concern for me to make the entire architectural world aware that the application of radiesthesia and its objectification with scientific measuring instruments combined with the GeoWave® achieves perceptible harmonisation of the entire sleeping, living and working area."

Installation and Sphere of Activity of the GeoWave®:

**Use and installation of the GeoWave®
are the easiest things in the world.**

If our metrologist comes to the premises, he takes care of placement and installation. Your Feng Shui consultant or radiesthesist will be happy to advise you, or you can install the GeoWave® yourself. The wave is installed at the highest possible point – e. g. in the attic or on the top floor of a building. In the apartment install the GeoWave® where you feel most comfortable.

The wave radiates downwards with a dome-shaped effect – also through walls and right up to and through the 5th floor.

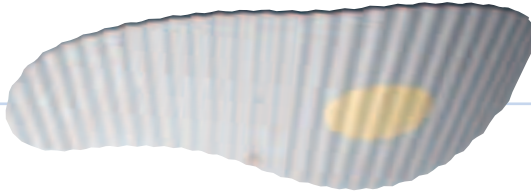

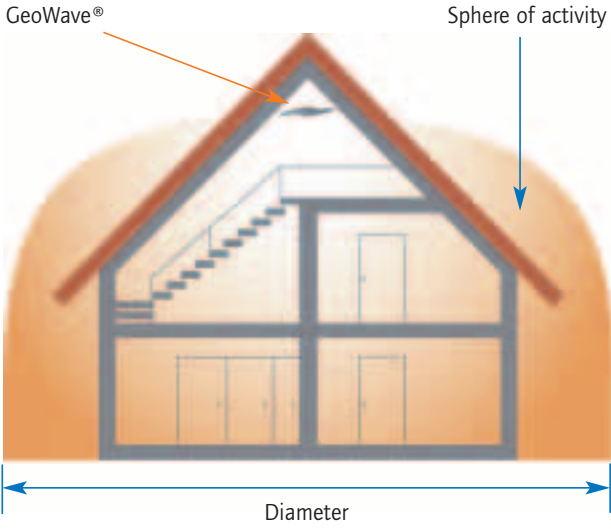

Univ.-Prof. Dr. Gerhard W. Hacker,

Director of the Research Institute for
Fundamental and Fringe Issues in Medicine
and Biotechnology at St. Johann's Hospital
in the Salzburg Regional Clinics:

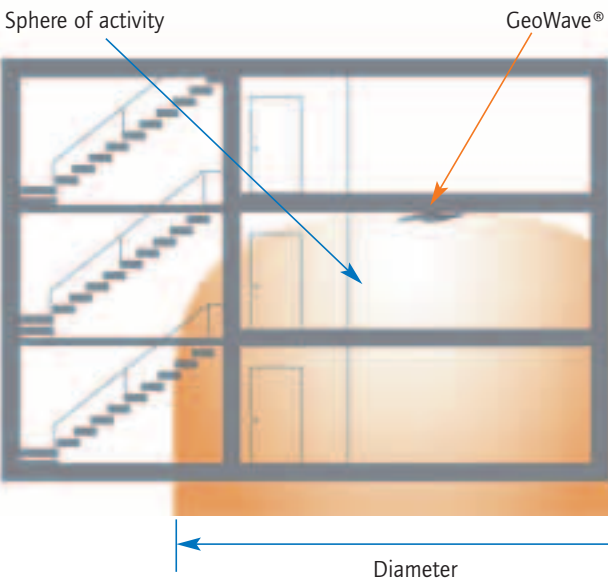

"In our scientific studies we were able to prove with the maximum statistical significance that the GeoWave® has a harmonising effect – this not only manifests in geopathically stressed areas ('water veins etc) but also in neutral locations. The wave provides most people with additional "energy", has a balancing effect and reduces stress.

RESEARCH COLLABORATION

GEOWAVE RESEARCH is the initiator of
research collaboration with the Viennese
Hospital Association (City of Vienna), the
City of Salzburg, the Salzburg Regional
Clinics and other institutions.

GEOWAVE RESEARCH also participates in
international research with the Technical
State University St. Petersburg, Russia.
Scientific Engineering Research Mt. Best Australia
and many other GDV users worldwide.

GEOWAVE RESEARCH is a member of the
International Union of Medical and Applied
Bioelectrography (IUMAB) and a representative
of the IUMAB in Austria.
